

## Resources

Below are links to some useful web-based learning resources about the seafood industry.

### *Australia-wide*

- The [Fisheries Research and Development Corporation](#) website contains information about fishing in Australia.
- Fact sheets about Australian seafood are available on the [Australian Seafood](#) website.
- [PrimeZone](#) is a website designed as a ‘one-stop shop’ for primary industries resources. The site is currently expanding and will be searchable by the Australian Curriculum when finalised.
- The [Seafood Cooperative Research Centre](#) website includes some useful resources, including for schools
- Information about fish, and how to keep and care for them, can be found at [Fish School](#).
- The [Australian Fisheries Management Authority](#) on-line game, ‘The great Australian fisheries challenge’ is a good introduction to the complexities and decision making processes of fisheries resource management.
- The [Centre of Excellence for Science, Seafood and Health](#) at Curtin University has developed this website about seafood nutrition especially for children. It includes information and a game.
- These [SeaWeek](#) resources are from New Zealand, but the questions for classroom discussion and activities are also relevant for Australian commercial fisheries education.
- The [Seafood New Zealand website](#) also offers educational resources, as does the [New Zealand Ministry of Fisheries](#).

### *Tasmania*

- The Tasmanian [Redmap](#) web site is a fantastic resource for learning about the Tasmanian marine environment and has a [Teacher Resource section](#). The ‘Resources’ page contains information about commercial fishing in Tasmania as well as the Tasmanian marine environment.
- The [Tasmanian Seafood Industry Council](#) has information about current issues in Tasmanian fisheries on their website.
- The [Tasmanian Dept of Primary Industries, Parks, Water and Environment](#) provide information about fishing and the marine environment on their website, including [Fish Fact Sheets](#).
- The [Woodbridge Marine Discovery Centre](#) lists a number of teacher resources on its website. There are three downloadable units: *Fishing for the Future* (most relevant to SIPS teachers), *Tasmanian Marine Biodiversity* and *Humans and the Sea*.

- [Fishcare Tasmania](#) offer educational visits and talks for your class. Fishcare focus on recreational fishing, but may complement your SIPS partnership or marine unit.

#### *New South Wales*

- The Department of Primary Industries has online information about [commercial fishing](#) and the [FishCare](#) volunteer program in NSW.
- [Fish n Kids](#) is a resource especially for children, developed by the NSW Department of Primary Industries
- Catch 'N' Cook provides authentic Aboriginal cultural experiences
- The [Bondi Marine Discovery Centre](#) and the [Central Coast Marine Discovery Centre](#) are great places to visit to learn about local marine life.
