9. Comply with all size limits as set out in the regulations.
10. Recognise and abide by the priority rights (regulated or otherwise) among commercial fishermen.
11. Comply with the by-laws and regulations of relevant local Councils and State Government authorities.
12. Ensure fishing operations are conducted with an acceptable level of safety for fishermen and the community, including a safety management system and sufficient insurance cover.
13. Be familiar with the list of, and methods of identifying protected and threatened species, populations and ecological communities that might be encountered during fishing operations.
14. Conduct fishing operations in areas, at times, and in a manner that minimises the potential for interaction with protected or threatened species, populations and ecological communities.

# NSW Ocean Trap and Line Code of Practice

15. Ensure any captured individual of a protected or threatened species is returned to the water as quickly as possible and with the least possible harm.
16. Ensure any interactions with Threatened, Endangered or Protected species are recorded in catch and effort logbooks.
17. Conduct fishing operations in areas, at times, and in a manner, that minimises levels of bycatch.
18. Use equipment or practices that ensure the least possible harm to any non-retained catches returned to the water.
19. Ensure only lawful implements are used to sort catches.
20. 20. Comply with the requirements of the NSW Food Authority regarding the handling, icing, storage and transport of catches, to maximise quality and minimise food safety hazards.
