

NRM PLAN PURPOSE

More capacity and investment in marine and coastal NRM, for OceanWatch and delivery partners

FINAL OUTCOME

The 2023-2027 National Marine NRM Plan that is co-designed by multiple stakeholders around Australia

ECONOMIC OUTCOMES

Fundable scalable activities relevant to the Dept. of Agriculture, Fisheries and Forestry

Fundable, scalable activities relevant to the Dept. of Climate Change, Energy, the Environment and Water

Fundable, scalable activities relevant to State and Territory departments and local government aims

Fundable, scalable activities relevant to business and philanthropic opportunities

FINAL OUTPUTS

Dec 2022: a draft plan that includes the internal review & workshops results. To be updated once we receive the results of the national survey which will be done in Dec 22 - Jan 23

A final plan that includes the results of the survey. **Finished by: March 2023**
What is expected to change: minor updates expected to the contents of the plan. Ranking of actions may change.

INTERMEDIATE OUTPUTS

A draft plan, with updated priorities & objectives

Feedback on objectives & their measures, ranked state/territory-based fundable actions to include in the plan

Validation by a wider and larger in number demographic that the priorities are supported

INTERMEDIATE OUTCOMES

A forward thinking plan that's scalable, invest able, supplements others efforts

State based granularity in priorities

Validation by a wider and larger in number demographic that the priorities are supported

ACTIVITIES

Internal review of Interim Plan, other current plans, current priorities

7 coastal state/territory based workshops

National survey of saltwater community and industry

INPUTS

Resources to support

Core OceanWatch staff with biological and planning expertise

External professional facilitator

Social Scientist IMAS for survey
